

System Design (Telusko) - Day 17

One-Shot 5h course | Video 4:00-4:15

Blob / Object Storage

Store large files cheaply and durably.

Key concepts

- Object stores (S3, GCS) hold blobs: images, video, backups.
- Highly durable and scalable; served via CDN.
- Store the file in blob storage, the metadata/URL in your DB.
- Presigned URLs for secure direct upload/download.

Key example

Upload -> object storage; DB stores the key + metadata; serve via CDN.

Today's tasks (1.5h)

- ☐ Learn object vs block storage
- ☐ Design image upload
- ☐ Note presigned URLs
