

DSA (Abdul Bari) - Day 18

45-day plan | YouTube playlist course

Linked List - Doubly & Circular

Two-way links and circular lists.

Key concepts

- Doubly: prev + next pointers (easier deletes).
- Circular: last node points to head.
- More memory, more flexibility.

Key idea / example

Doubly linked list allows $O(1)$ delete given the node.

Today's tasks (1.5h)

- ☐ Implement a doubly linked list
- ☐ Build a circular list
- ☐ Compare with singly
