

Binary Tree Traversals

Inorder, preorder, postorder, level-order.

Key concepts

- DFS: pre/in/post order (recursion).
- BFS: level-order (queue).
- Inorder of a BST gives sorted output.

Key idea / example

Inorder: left, root, right.

Today's tasks (1.5h)

- ☐ Implement all 3 DFS traversals
- ☐ Do level-order with a queue
- ☐ Note BST inorder is sorted
