

Topological Sort

Order a DAG so edges point forward.

Key concepts

- Only for Directed Acyclic Graphs.
- Kahn's algorithm (indegrees) or DFS-based.
- Uses: build order, scheduling.

Key idea / example

Remove nodes with indegree 0 repeatedly (Kahn's).

Today's tasks (1.5h)

- ☐ Implement topo sort
- ☐ Detect a cycle (no valid order)
- ☐ Apply to task scheduling
