

DSA / Algorithms (Abdul Bari) - Day 4

45-day plan mapped to the Algorithms playlist

Classes of Functions

Orders of growth and comparing classes of functions.

Watch these Abdul Bari videos

- > 1.6 Classes of functions
- > 1.7 Compare Class of Functions

Key concepts

- Growth order: $1 < \log n < n < n \log n < n^2 < 2^n < n!$.
- Compare functions by their highest-order term.
- Constants and lower terms are dropped.

Key idea

n^2 grows faster than $n \log n$ for large n .

Tasks (1.5h)

- ☐ Watch both videos
- ☐ Order 6 functions by growth
- ☐ Explain why constants drop
