

DSA / Algorithms (Abdul Bari) - Day 13

45-day plan mapped to the Algorithms playlist

Heap, Heap Sort & Priority Queue

Heaps, heapify, heap sort and priority queues (long lecture).

Watch these Abdul Bari videos

> 2.6.3 Heap - Heap Sort - Heapify - Priority Queues

Key concepts

- Max/min heap; array-backed complete tree.
- heapify maintains order in $O(\log n)$.
- Heap sort is $O(n \log n)$ in place.

Key idea

Build heap $O(n)$, then extract max n times $\rightarrow O(n \log n)$.

Tasks (1.5h)

- ☐ Watch the 51-min lecture
- ☐ Implement heapify
- ☐ Code heap sort
