

DSA / Algorithms (Abdul Bari) - Day 17

45-day plan mapped to the Algorithms playlist

Greedy Method + Fractional Knapsack

Greedy strategy and the fractional knapsack problem.

Watch these Abdul Bari videos

- > 3. Greedy Method - Introduction
- > 3.1 Knapsack Problem - Greedy Method

Key concepts

- Greedy makes the locally best choice each step.
- Fractional knapsack: take highest value/weight first.
- Works because items are divisible.

Key idea

Sort by value/weight ratio, fill greedily.

Tasks (1.5h)

- ☐ Watch both videos
- ☐ Solve fractional knapsack
- ☐ Note why greedy works here
