

DSA / Algorithms (Abdul Bari) - Day 22

45-day plan mapped to the Algorithms playlist

DP Intro + Multistage Graph

Principle of optimality and multistage graph DP.

Watch these Abdul Bari videos

- > 4 Principle of Optimality - Dynamic Programming introduction
- > 4.1 MultiStage Graph - Dynamic Programming
- > 4.1.1 MultiStage Graph (Program) - Dynamic Programming

Key concepts

- DP: optimal substructure + overlapping subproblems.
- Solve stage by stage, storing results.
- Forward/backward approaches.

Key idea

Multistage graph: shortest path computed stage by stage.

Tasks (1.5h)

- [] Watch the 3 videos
- [] State the principle of optimality
- [] Solve a multistage graph
