

DSA / Algorithms (Abdul Bari) - Day 26

45-day plan mapped to the Algorithms playlist

Bellman-Ford

Single-source shortest path with negative edges.

Watch these Abdul Bari videos

> 4.4 Bellman Ford Algorithm - Single Source Shortest Path - Dynamic Programming

Key concepts

- Relax all edges $V-1$ times.
- Detects negative-weight cycles.
- $O(V \cdot E)$.

Key idea

After $V-1$ passes, another relaxation means a negative cycle.

Tasks (1.5h)

- ☐ Watch the video
- ☐ Implement Bellman-Ford
- ☐ Detect a negative cycle
