

OBST - Successful & Unsuccessful

OBST including unsuccessful search probabilities (long lecture).

Watch these Abdul Bari videos

- > 4.6.2 [New] Optimal Binary Search Tree Successful and Unsuccessful Probability - Dynamic Programming

Key concepts

- Include gaps (unsuccessful searches).
- Weights combine p (keys) and q (gaps).
- Full OBST construction.

Key idea

$w[i][j]$ = sum of p and q in range; used in the DP.

Tasks (1.5h)

- [] Watch the 57-min lecture
- [] Add unsuccessful probabilities
- [] Rebuild the OBST
