

DSA / Algorithms (Abdul Bari) - Day 32

45-day plan mapped to the Algorithms playlist

Longest Common Subsequence

LCS by recursion and DP.

Watch these Abdul Bari videos

> 4.9 Longest Common Subsequence (LCS) - Recursion and Dynamic Programming

Key concepts

- Longest subsequence common to two strings.
- DP table on prefixes.
- Backtrack to recover the LCS.

Key idea

```
if a[i]==b[j]: dp[i][j]=1+dp[i-1][j-1].
```

Tasks (1.5h)

- ☐ Watch the video
- ☐ Fill the LCS table
- ☐ Recover the subsequence
