

DSA / Algorithms (Abdul Bari) - Day 35

45-day plan mapped to the Algorithms playlist

Backtracking + N-Queens

Backtracking approach and the N-Queens problem.

Watch these Abdul Bari videos

- > 6 Introduction to Backtracking - Brute Force Approach
- > 6.1 N Queens Problem using Backtracking

Key concepts

- Build a solution incrementally; undo on failure.
- Prune invalid branches early.
- N-Queens: one queen per row without conflicts.

Key idea

Place a queen per row, backtrack when attacked.

Tasks (1.5h)

- ☐ Watch both videos
- ☐ Code N-Queens
- ☐ Explain pruning
