

DSA / Algorithms (Abdul Bari) - Day 38

45-day plan mapped to the Algorithms playlist

Hamiltonian Cycle

Hamiltonian cycle via backtracking.

Watch these Abdul Bari videos

> 6.4 Hamiltonian Cycle - Backtracking

Key concepts

- Visit every vertex exactly once and return.
- Backtrack when stuck.
- Different from Euler cycle.

Key idea

Extend the path vertex by vertex, backtracking on dead ends.

Tasks (1.5h)

- ☐ Watch the video
- ☐ Code Hamiltonian cycle
- ☐ Contrast with Euler
