

# DSA / Algorithms (Abdul Bari) - Day 12

45-day plan mapped to the Algorithms playlist

## Binary Search

Binary search - iterative and recursive.

### Watch these Abdul Bari videos

- > 2.6.1 Binary Search Iterative Method
- > 2.6.2 Binary Search Recursive Method

### Key concepts

- Requires a sorted array.
- Halve the range each step ->  $O(\log n)$ .
- Iterative and recursive versions.

### Key idea

```
mid=(lo+hi)/2; go left/right by comparing key.
```

### Tasks (1.5h)

- ☐ Watch both videos
- ☐ Code iterative binary search
- ☐ Code the recursive version
