

DSA / Algorithms (Abdul Bari) - Day 19

45-day plan mapped to the Algorithms playlist

Huffman Coding

Greedy Huffman coding for compression.

Watch these Abdul Bari videos

> 3.4 Huffman Coding - Greedy Method

Key concepts

- Build a prefix code from character frequencies.
- Merge two lowest-frequency nodes repeatedly.
- Gives optimal prefix-free codes.

Key idea

Least frequent characters get the longest codes.

Tasks (1.5h)

- ☐ Watch the video
- ☐ Build a Huffman tree
- ☐ Derive the codes
