

DSA / Algorithms (Abdul Bari) - Day 33

45-day plan mapped to the Algorithms playlist

Graph Traversals - BFS & DFS

Breadth-first and depth-first search.

Watch these Abdul Bari videos

> 5.1 Graph Traversals - BFS & DFS -Breadth First Search and Depth First Search

Key concepts

- BFS uses a queue (level order); DFS uses recursion/stack.
- Visited set avoids revisits.
- Foundations for many graph algorithms.

Key idea

BFS gives shortest paths in unweighted graphs.

Tasks (1.5h)

- ☐ Watch the video
- ☐ Implement BFS
- ☐ Implement DFS
